

# Remote Work

# Remote Work. Rethink Office.

The once distinct spatial and temporal separation of work and leisure time is increasingly dissolving. More and more people are demanding new contentual motives and flexible possibilities to combine job and private life in a meaningful way.

Today, new digital communication tools offer options to work from anywhere. Workplaces are changing from the classic offices to home office or co-working spaces. This new generation of workers are demanding free choice in their work location, preferring to unfold their laptops in cafés, on the train, on park benches or even in the Bully on the beach. In globally networked project work, communication takes place via telephone conferences. Dedicated work places are not passé, but are adapted in their function and use. Communication requires not only functioning technology but also a suitably furnished room.

Flexibly usable tables offer the possibility to create an ideal working environment at home or in the office for defined periods of time. They can be transformed again and again as part of the designed space during the course of the day depending on the requirements.

System 180 has been dedicated to the development of table systems for different working places for years: our tables, benches and high desks are geared towards the increasingly complex requirements of designers and users. A table is a workplace, meeting table, storage table or a tool for agile working.

Our compact sitting/standing tables of the RackPod and BridgePro series offer you professional furniture for the pleasure of furnishing your workplace: timeless and functional aesthetic, flexible and modular, with many options in design and function.

# Flexible Platform

Our folding table series RackPod stands for mobility and flexibility in the office and in your own four walls. Thanks to their timeless design and two widths, the tables are easily integrated into existing furnishing concepts. If the function of the room changes, the RackPod can be stowed away to save space until the next use.

# Change of Perspective

Standing and sitting complement each other ergonomically in the daily routine.

That is why the RackPod table is available in two different heights. The table series was developed for flexible use in contemporary office environments and at home.

The practical accessories, which include the option of additional storage compartments or a cable tray for connecting your electronic devices, turn the RackPod into a fully functional workstation.

# RackPod

Modern working environments are on the move and flexible furnishing supports this development. With the folding tables RackPod we have developed a table programme in sitting and standing height that meets these requirements. Light, functional and with a lot of practical accessories, the RackPod Tables are adaptable for a variety of uses.

**Table RackPod S** with W/H/D: 160/75/79 cm

**Table RackPod L** with W/H/D: 180/75/90 cm

White honeycomb tabletop with black edge, folding frame, casters Ø 75 mm optionally on adjustable feet

**Sitting container SitRack #65731**

W/H/D: 41/48/39 cm

pullout plastic box with organisation accessories and lid, casters Ø 75 mm

And when they are not needed, they can be stored in a space-saving manner in just a few steps thanks to the folding frame. The RackPod tables are particularly well-suited to situations where you need a minimalist design combined with flexibility and mobility.

**Standing table RackPod H**

W/H/D: 160/108/79 cm

White honeycomb tabletop with black edge, folding frame, casters Ø 75 mm optionally on adjustable feet

# RackPod Accessories

The accessories of the RackPod series are committed to the philosophy of flexibility and simplicity and meet the demands of a digital working environment. Easily retrofittable elements for the management of power and media technology as well as

functional storage compartments turn the RackPods into adequate work islands. The accessories are designed so they can be attached to and removed from the tables at any time without the need for tools.

**Multibox #39262**

W/H/D: 79/12/12 cm

- for RackPod S und H
- sheet metal, powder-coated in black
- two pull-out trays padded with cork

**Cable trough S #38936**

W/H/D: 150/10/12 cm

- for RackPod S und H
- sheet metal, powder-coated in black

**Cable trough L #38542**

W/H/D: 132/10/12 cm

- for RackPod L
- sheet metal, powder-coated in black

**Storage space**

**left: #39263**

**right: #39264**

W/H/D: 24/14/35 cm

- for all RackPod models
- sheet metal, powder-coated in black
- 2 acrylic drawers: W/H/D: 23/3/35 und 23/9/35 cm

**Technical connection ON**

**white: #58283**

**black: #58284**

- for all RackPod models
- 2 safety plugs, 1 double USB port, 1 RJ45 port
- cord and fixtures
- Housing and mounting bracket made of aluminium

**Sets consisting of 4 screw feet**

- for table height 72-76 cm: #39906
- for table height 76-80 cm: #45984

# Freedom of Design

Our BridgePro tables in three different formats are the right choice when it comes to permanently furnishing your workstation at home or in the office.

Functional design, ample legroom, mobility, high-quality details, as well as a large selection of coloured surfaces and veneers make the table the visual centre of your everyday life.

In the BridgePro we have combined everything we like to see in a modern, uncompromising table.

# Optimal Functionality

Many things that we deal with in our daily routine can be done standing up: working on the notebook, phone calls, short meetings, the cup of coffee in between.

The BridgePro table series offers you different heights, which you can also combine with each other. We offer both versions in three compact sizes, so that the desired BridgePro tables can be perfectly integrated into your room.

Our accessories offer a wide range of options for the well thought-out accommodation of the required technology.

# BridgePro

BridgePro is the elegant all-rounder for the office and at home. Instead of the Bridge table's distinctive zigzag crossbars, the BridgePro uses slim steel profiles. These provide more legroom under the table and space for a mobile container.

**Table BridgePro S** with W/H/D: 144/76/72 cm  
**Table BridgePro M** with W/H/D: 162/76/81 cm  
**Table BridgePro L** with W/H/D: 180/76/90 cm  
Table top 16 mm with black edge, castors Ø 75 mm, optionally on adjustable feet

**Smart Container #39905**  
W/H/D: 41/66/48 cm  
1 drawer, 1 door, 1 back panel, casters Ø 50 mm

The standard castors ensure unlimited mobility and adjustable feet are optionally available. Our Smart Container, also on castors, offers storage space for writing utensils, office supplies and personal items.

**Standing Table BridgePro S** with W/H/D: 144/107/72 cm  
**Standing Table BridgePro M** with W/H/D: 162/107/81 cm  
**Standing Table BridgePro L** with W/H/D: 180/107/90 cm  
Table top 16 mm with black edge, castors Ø 75 mm, optionally on adjustable feet

# BridgePro Accessories

With the optionally available accessories you can ideally equip every work surface for the intended use. The decisive factor in choosing the right accessories is whether technical components are to be permanently installed and connections concealed or

whether equipment is to be changed frequently and connections must be easily accessible. Device box, device inlay and device top can be equipped with different connection modules.

**Device Box**  
The device box consists of a technology tray, cover and cable fixation. Plugs and cables can be stored in the technology tray and disappear under the cover.

**Device Inlay**  
The device inlay is inserted flush into the technology cutout. The connections can be fitted as required and are easily accessible for use.

**Device Top**  
The device top is placed on the device cutout. The body made of black powder-coated steel forms a zoning on the table surface and carries technology modules on both long sides. The upper end of the attachment offers a practical pen tray.

**Socket strip IN Start**

- 4 safety plugs
- Current input: GST18; current output: GST18
- Cable length: 3 m
- Black plastic body

**Socket strip IN Free**

- 2 safety plugs
- 2 freely assignable modules (here: 1 slot USB 3.0, HDMI 2.0 and RJ45 CAT6)
- Current input: GST18; current output: GST18
- Cable length: 3 m
- Black plastic body

**Socket strip IN USB Charge**

- 2 safety plugs and 1 USB double charger
- 1 freely assignable module (here: RJ45 CAT6)
- Current input: GST18; current output: GST18
- Cable length: 3 m
- Black plastic body

Table BridgePro M

Standing table BridgePro M

Smart Container #39905

# Surface Selection

For the surface finish of the tube structure you can choose between the brushed stainless steel surface **SteelLine** and the powder-coated surface **BlackLine**.

**SteelLine**  
Brushed stainless steel

**BlackLine**  
Stainless steel, powder coated in black

With the **BridgePro** tables you can choose from 11 unidecors, 2 real wood veneers and 3 linoleum colours. Black colour-through MDF panels with thermally smoothed, sealed edges

function as base material. The tables of the **RackPod** series are available exclusively with a 38 mm thick, white tabletop with black edges.

**Unidecors**

Coated on both sides with a protective coating of melamine resin.

**Wood veneers**

Veneered on both sides with a matt finish.

**Forbo furniture linoleum (BridgePro work surfaces only)**

Surface coated with high-quality furniture linoleum.

Colour deviations may occur due to printing technology. We reserve the right to make technical changes.
