Space Systems

SYSTEM 180

Spaces for a new togetherness

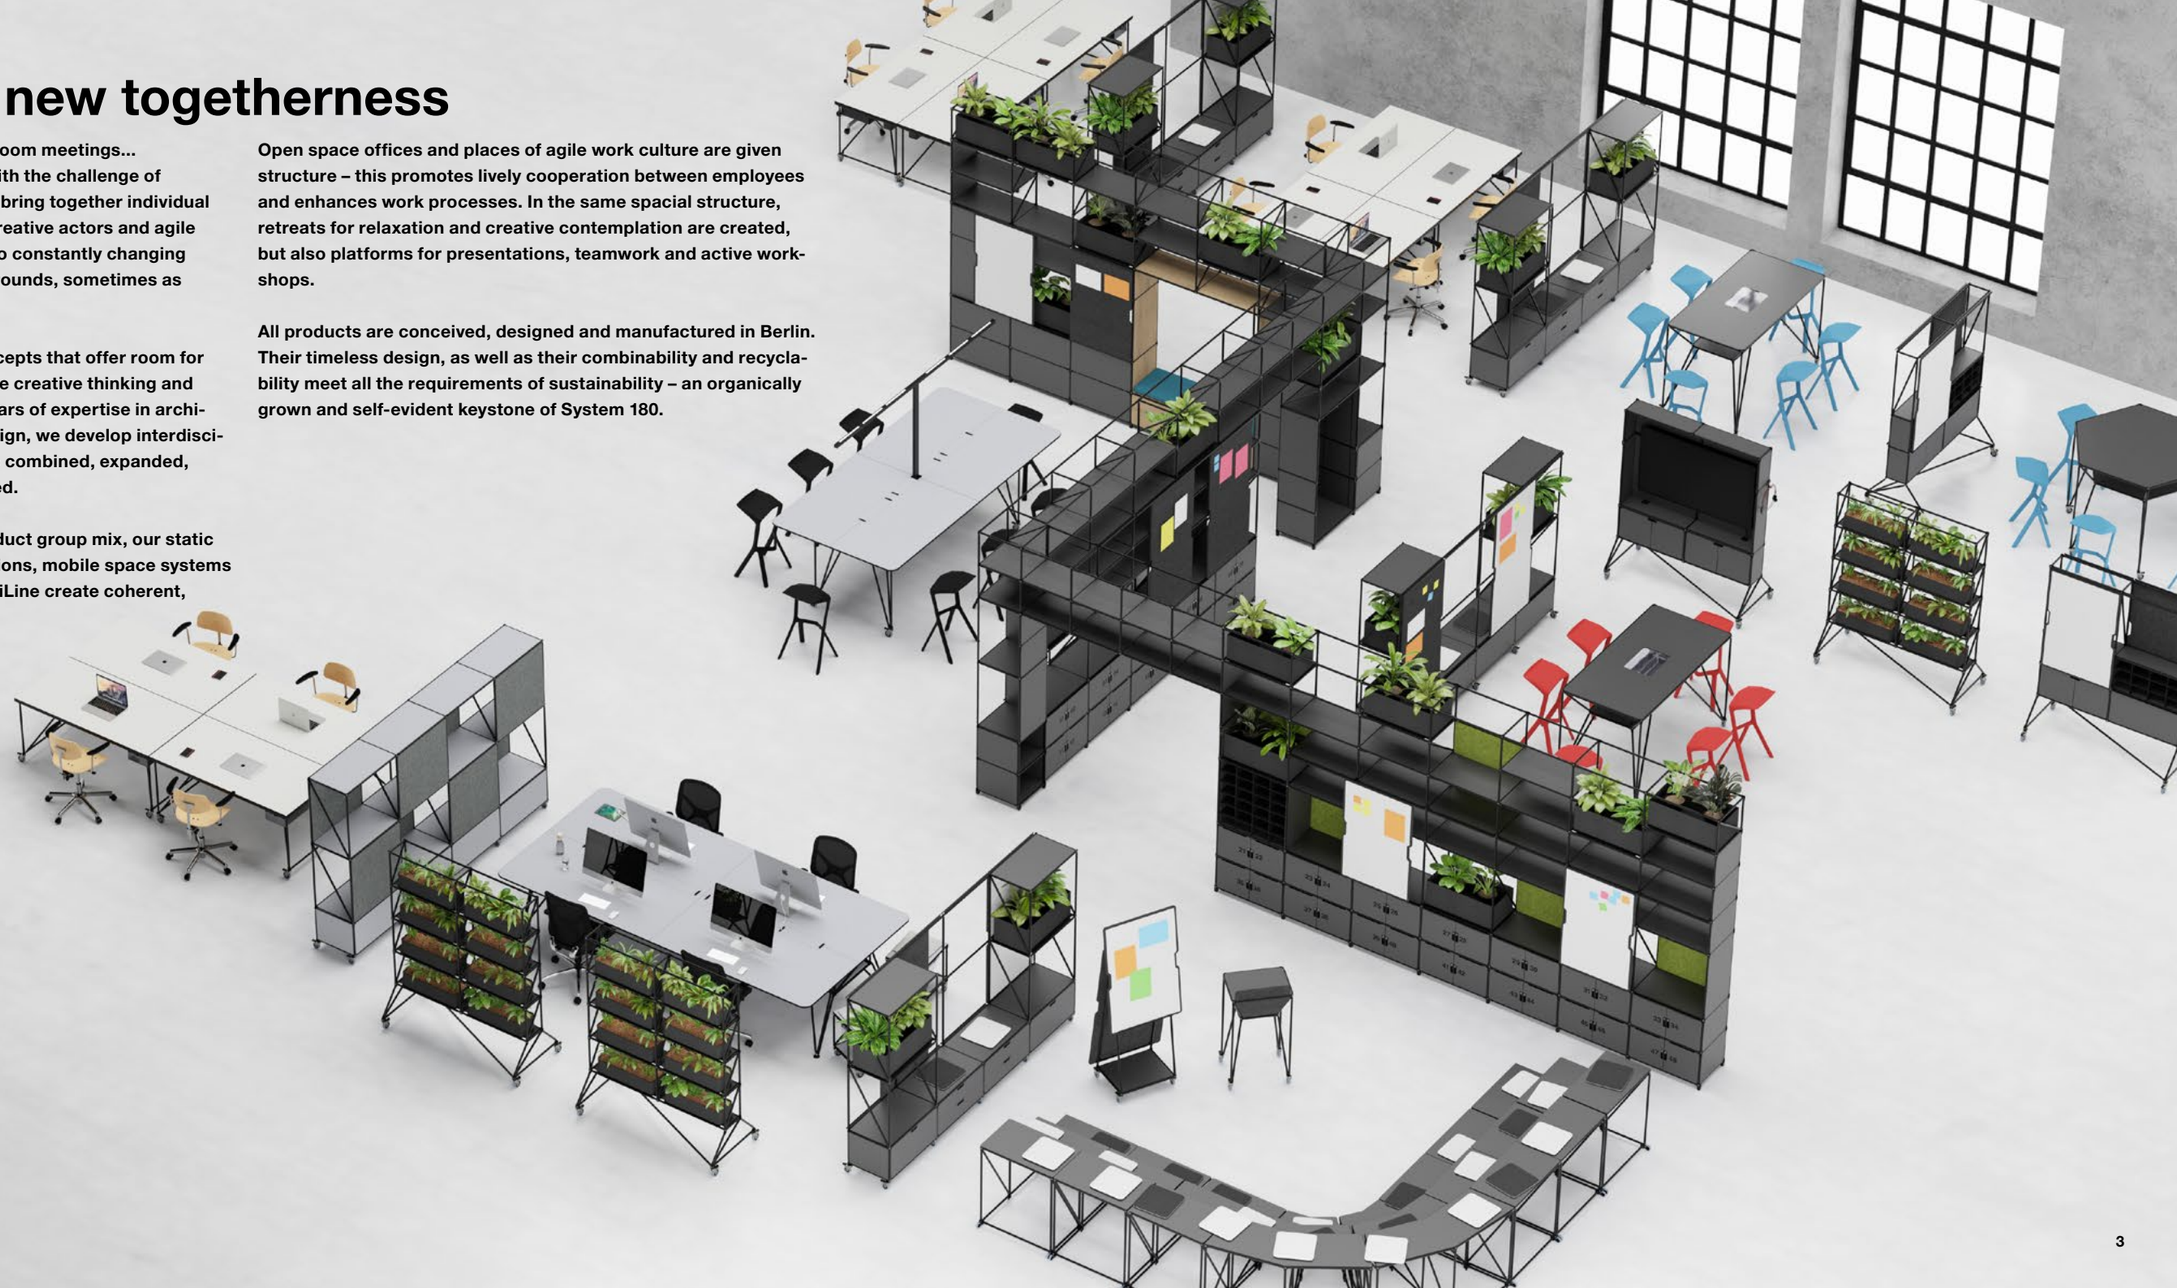
Home office, remote working hours, zoom meetings... The modern working world is faced with the challenge of designing hybrid office solutions that bring together individual working and collaborative aspects. Creative actors and agile methods require settings that adapt to constantly changing needs - sometimes as framing backgrounds, sometimes as flexible scenery.

System 180 develops end-to-end concepts that offer room for these diverse demands and encourage creative thinking and creative processes. With our many years of expertise in architecture, planning, production and design, we develop interdisciplinary, modular solutions that can be combined, expanded, exchanged or reconstructed as needed.

Whether used individually or as a product group mix, our static space systems for long-term installations, mobile space systems on castors or our highly dynamic PartiLine create coherent, overall interior design images.

Open space offices and places of agile work culture are given structure – this promotes lively cooperation between employees and enhances work processes. In the same spacial structure, retreats for relaxation and creative contemplation are created, but also platforms for presentations, teamwork and active workshops.

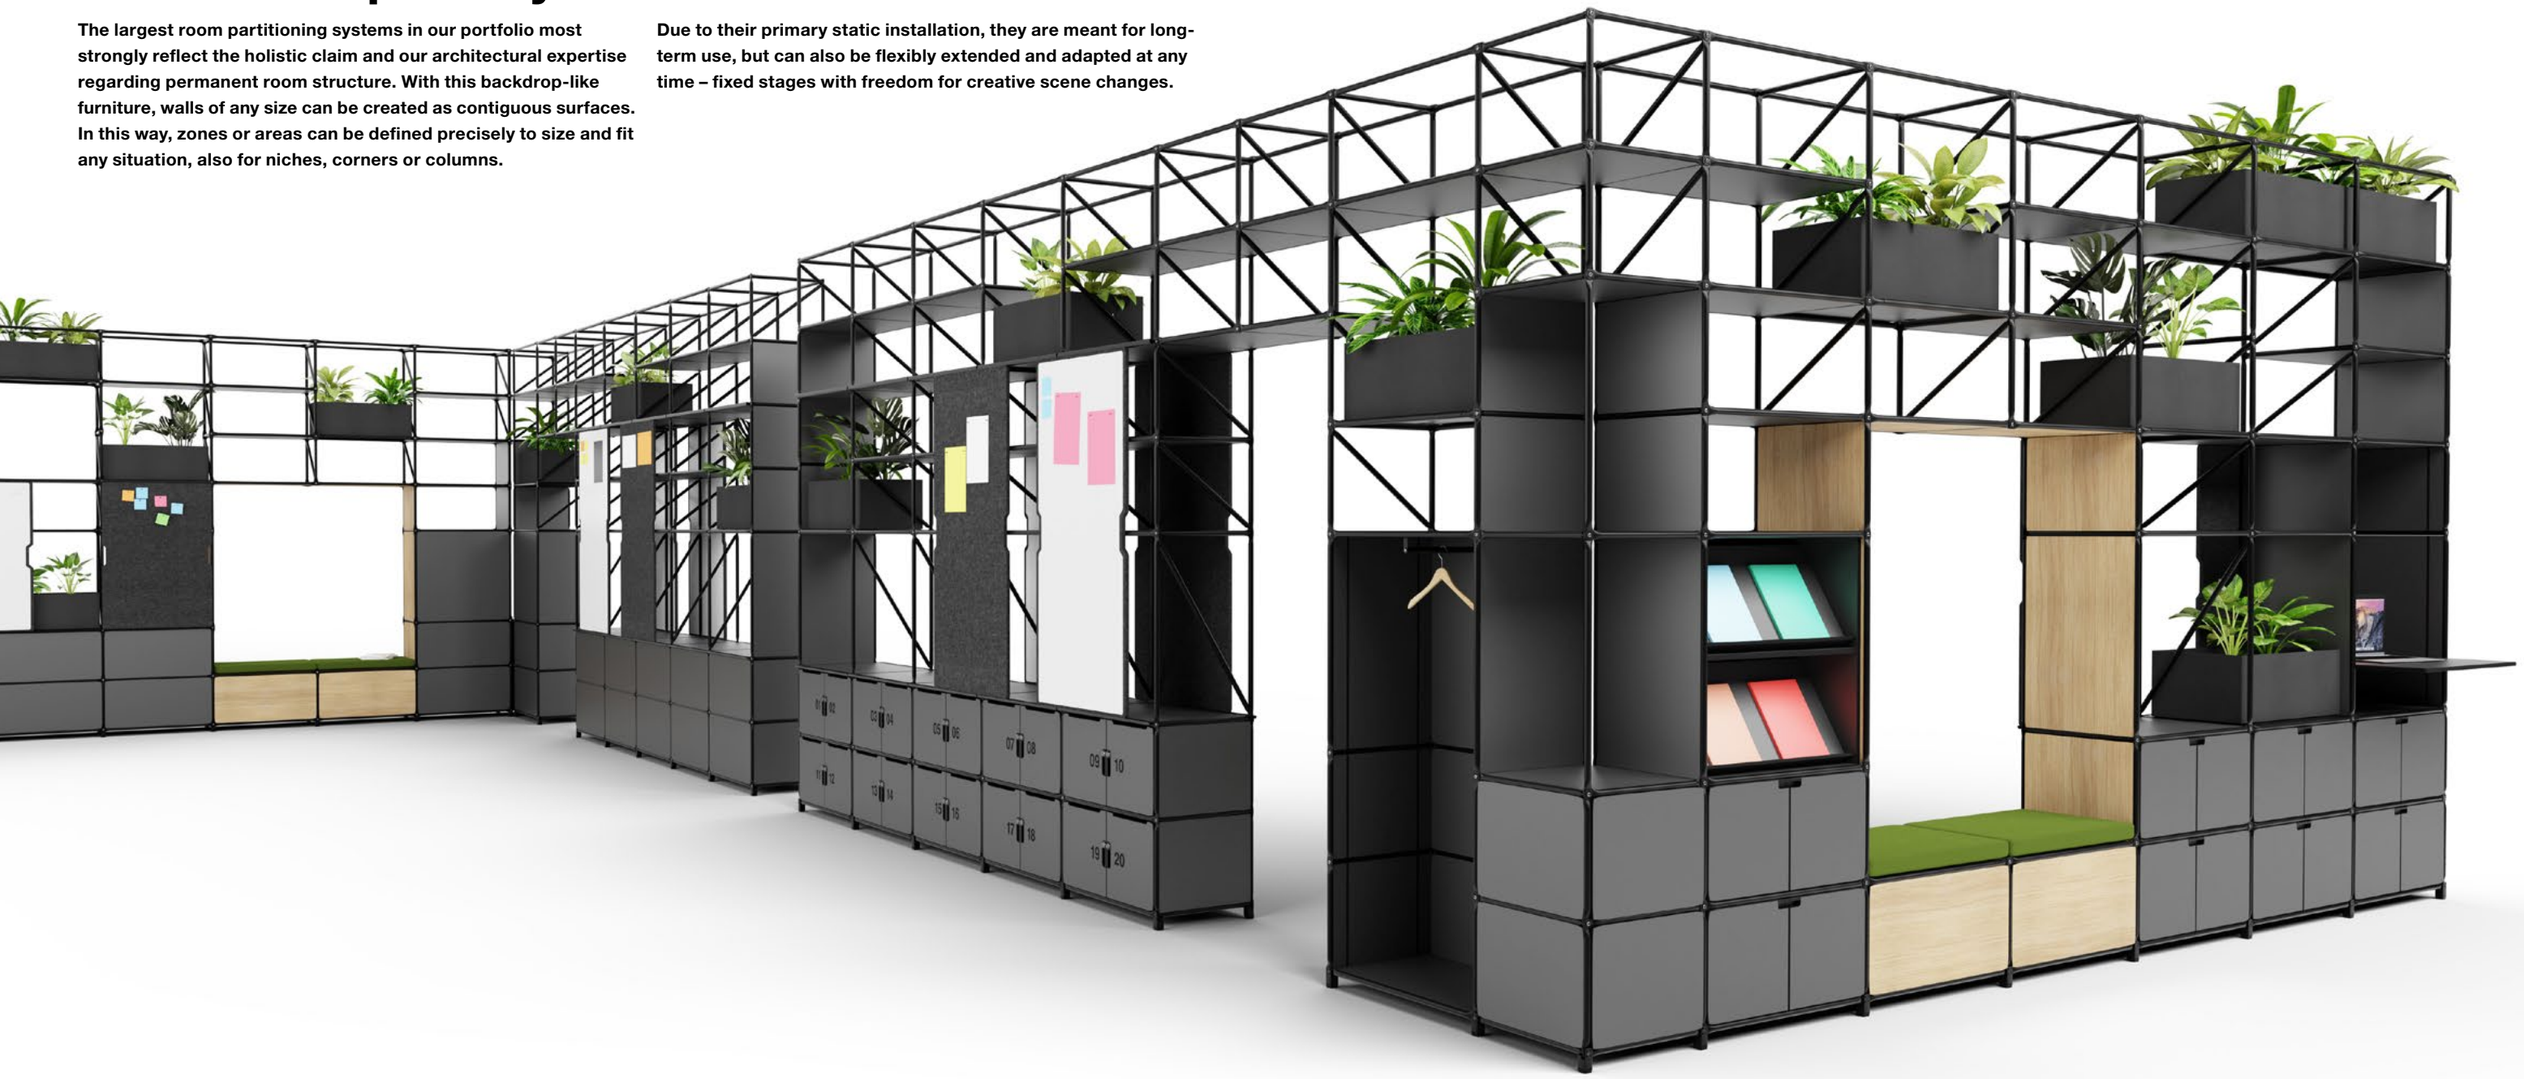
All products are conceived, designed and manufactured in Berlin. Their timeless design, as well as their combinability and recyclability meet all the requirements of sustainability – an organically grown and self-evident keystone of System 180.



The static space system

The largest room partitioning systems in our portfolio most strongly reflect the holistic claim and our architectural expertise regarding permanent room structure. With this backdrop-like furniture, walls of any size can be created as contiguous surfaces. In this way, zones or areas can be defined precisely to size and fit any situation, also for niches, corners or columns.

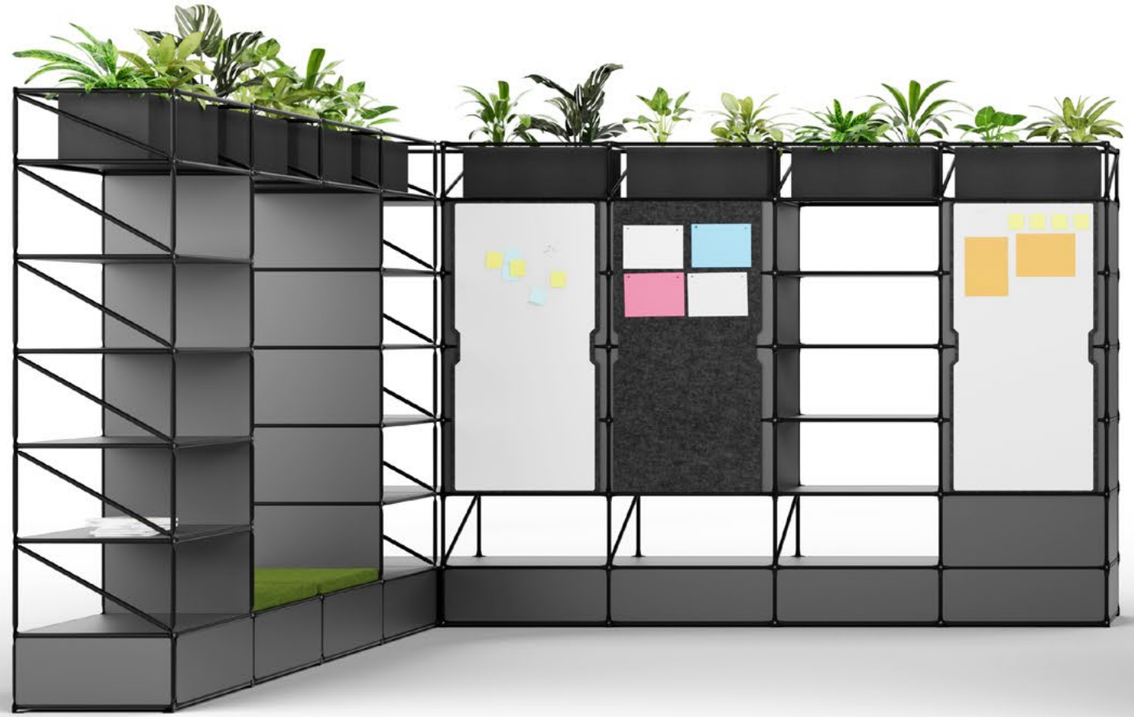
Due to their primary static installation, they are meant for long-term use, but can also be flexibly extended and adapted at any time – fixed stages with freedom for creative scene changes.



Configuration defines function

The modular structure as well as individual fittings and various surface colours and materials of the space system offer a maximum of design freedom. The particular composition underlines the function of the room and enables both closed and permeable visual references. Classic office looks as well as modern new work scenarios can be created by adding the fitting furnishing details and combining them with variable, movable elements from our extended product groups.

Practical components such as lockers, storage elements, pinboards & whiteboards or acoustic-regulating surfaces are ideal for designing remote workplaces. Cosy seating or the integration of living plants create a lounge character and private spheres.



The mobile space system

For medium- and long-term zoning System 180 offers a simple and effective solution: a mobile space system on castors that literally brings movement into your everyday office life. Whether for a few days, weeks or months – the two-sided usability and various equipment options of the shelf modules offer scope for creating a wide variety of sceneries.

While transparencies support the integration between teams or individual employees, privacy elements create compact areas for concentrated work.

Versatile design

Our mobile space systems can be customized in many different ways and focuses on various design aspects. Integrated wardrobe elements, but also hidden storage spaces and shelves provide order and streamlined work processes. Acoustic elements and living plants provide a healthy room climate and reduce disturbing noises.

Choose standing desks, pinboards or sideboards that are mounted on castors to match the space system and define the character of the room.

Mobile space system manual

Our mobile shelving units, mounted on castors, can be installed in all dimensions as required, and can be flexibly extended or reduced. With a fixed depth of 430 and a fixed height of 1800, we offer individual solutions for a wide range of spatial conditions and aesthetic requirements.

The widths are variable depending on the number of modules. The minimum width is 2 x 720, the maximum 4 x 720.

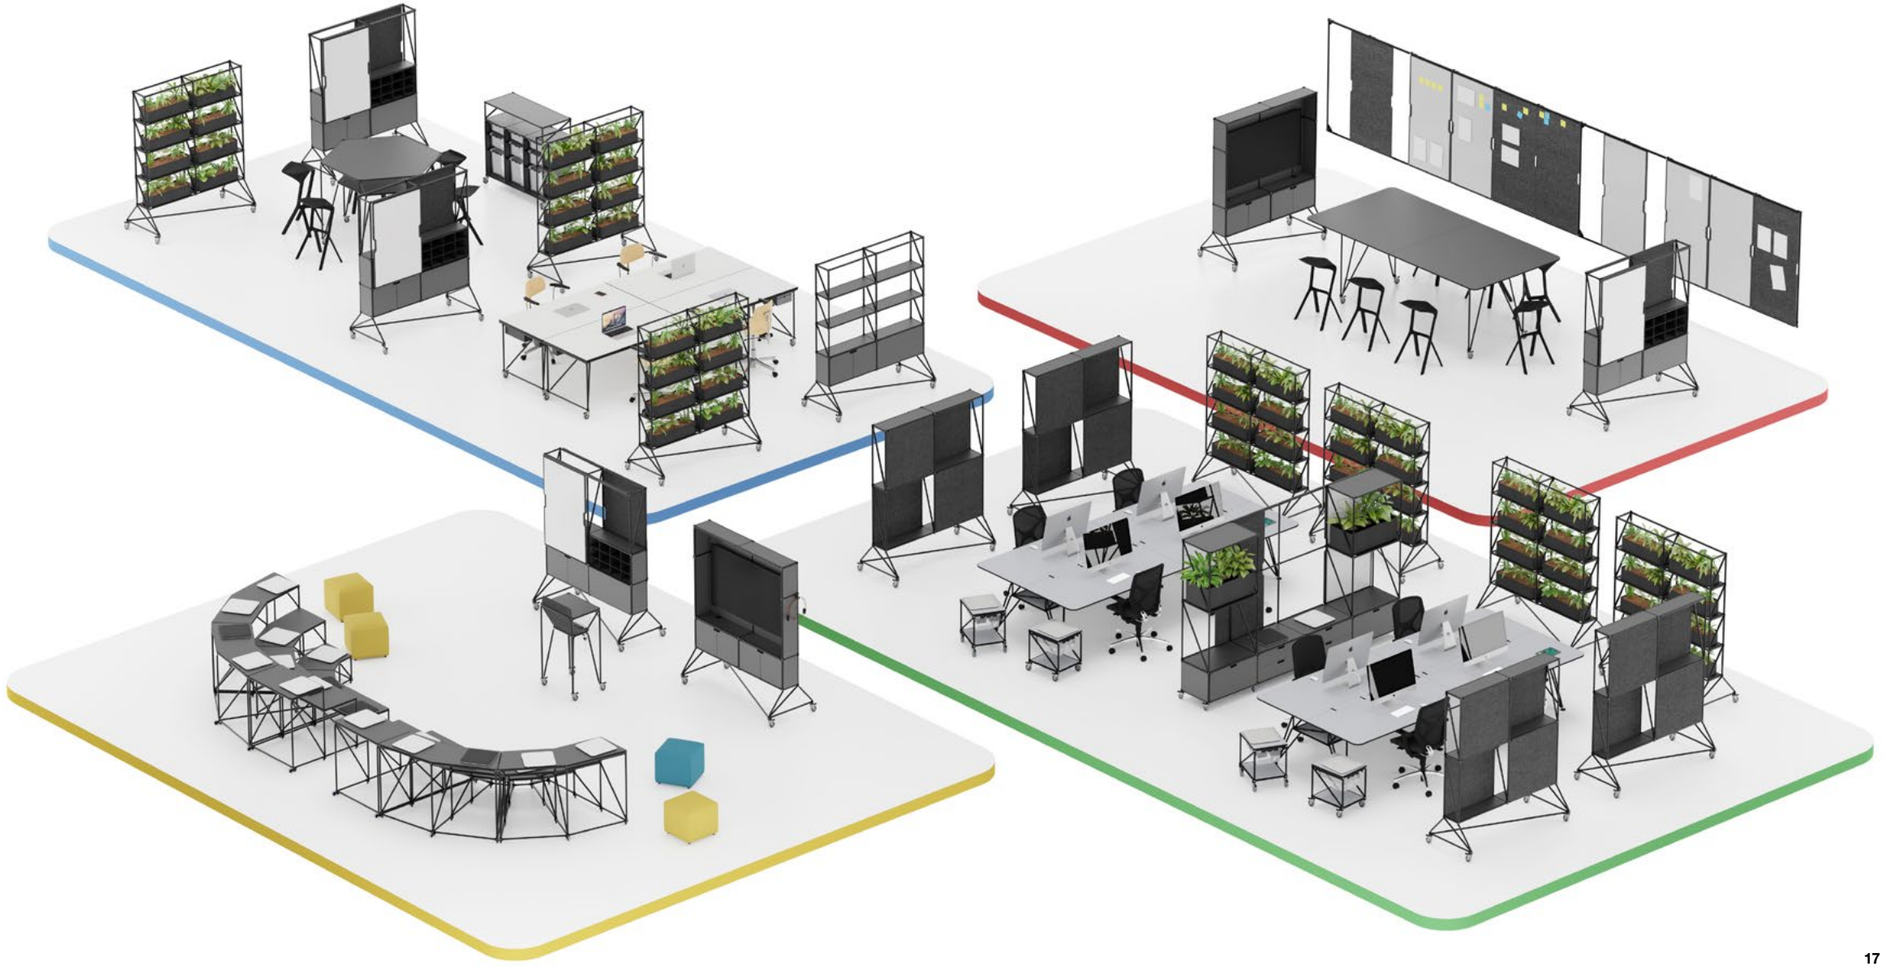
Dynamic space system PartiLine

With the highly flexible PartiLine space system, we offer a solution to the diverse demands of collaborative work and a logical evolution of the System 180 concept. The system, which consists of six independent products – CreativeParti, OpenParti, GardenParti, QuietParti, RemoteParti and RemoteParti Pro – is designed for short- and medium-term use of small spaces, for example workshops and events, as well as for the creation of fast-changing environments. Due to its adaptability, the PartiLine is ideal for supporting modern working methods such as Agile Work, New Work or Design Thinking.

From left to right: CreativeParti, OpenParti, GardenParti, RemoteParti Pro, QuietParti and RemoteParti

Function creates space

The specific features of the five Partis, limited to a few functions, offer quick solutions for diverse needs and situations. Their compact format, two-sided usability (with the exception of RemoteParti and RemoteParti Pro) and their agile castor design make the PartiLine a flexible player in the modern working context. The Partis can be perfectly combined – with equal height and width, they can be lined up and stacked horizontally, but also aligned facing each other. The versatile positioning options enhance harmonious room structures and effective use.



Team Space

With focus on teamwork, the CreativeParti is designed for interaction, development, and prototyping. CreativePartis with portable FlexBoards Pro for writing and pinning support creative processes, while work materials can be stored in them. The mobile, foldable Rack Pod tables and the DT-Line Tables enhance the workspace character, while GardenPartis add feelgood ambience.

Presentation/Event Space

Our standing lectern SpeakerDesk and the individually arrangeable tribune modules SitUp are ideal for arranging creative auditorium situations. The combination of RemoteParti with TV and CreativeParti with integrated pin- and whiteboard surface plus the optional FlexBoard Pro offers room for hybrid and classic presentation methods as well as storage for workshop materials.

Meeting Space

The RemoteParti mobile unit with extensive technical equipment together with the CreativeParti with integrated storage space, practical pin- and whiteboard surfaces plus the optional FlexBoard Pro for visual support are suitable for creating a temporary meeting place for presentations and workshops. The mobile standing table Table System K or the Table System K Workbench in combination with additional pin- and whiteboard surfaces provide the ideal environment for collaborative brainstorming processes.

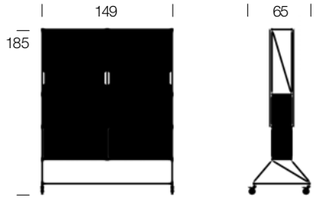
Work Space

Open space concepts and noisy open-plan offices require intelligent partitioning and a clear arrangement of individual work units. The combination of acoustic-optimising QuietPartis and green GardenPartis, together with variable chair-table combinations (K table system Workbench and the SitRack seating container) add a harmonious structure and vitality to the space.

CreativeParti

Creativity, brainstorming, inspiration - CreativeParti most strongly evokes associations with the sphere of agile working and its methods. With plenty of storage space and shelves for various workshop materials such as Post-Its, pens, Lego bricks, paper, magnets and small boxes, the unit ensures proper organisation and structure.

Our optional FlexBoard Pro is a useful extension to the classic whiteboard. The whiteboard and pin surface can easily be taken to another location or integrated into other modules within the System 180 world.



CreativeParti

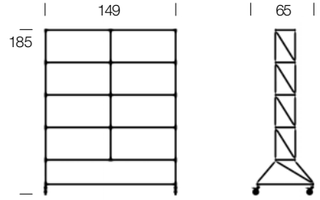
W/H/D: 149/185/65 cm

Dynamic space system, 2 double doors, 2 magazines, 2 FlexBoard Pro M, 4 back panels, castors Ø 75 mm

GardenParti

As a source of oxygen and factor for cosy atmosphere office greenery is becoming increasingly important. GardenParti addresses the issue with a clear commitment to authenticity: all integrated plants are living hydroponics that are easy to maintain and set harmonious accents thanks to the unit‘s intelligent design. The required plant boxes can be purchased through our partner Element Green and inserted into the unit.

The eight plant boxes are inserted into the shelves specifically made for this purpose and can, like the planting and its care, be purchased from our network partner Element Green ® (article: 3000-0597-0199-0154 Basic Rectangle 597 x 199 x 145 mm blank)



GardenParti

W/H/D: 149/185/65 cm

Dynamic space system, 8 stainless steel shelves (suitable for plant containers from Element Green®, article: 3000-0597-0199-0154 Basic Rectangle 597 x 199 x 145 mm blank), castors Ø 75 mm. Plant boxes and planting not included.

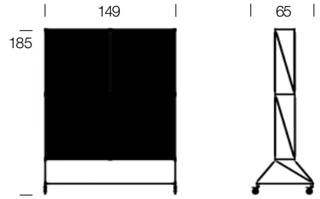
QuietParti

QuietParti is dedicated to the topic of noise reduction and is especially designed for use in open-plan offices, but also in working environments with frequently changing actors. QuietParti contains acoustic elements made of an innovative fiber fleece material.

The high sound-absorbing effectiveness of the furniture has been confirmed by the acoustics test center of the Technical University of Berlin. QuietParti can be optionally booked with single or double-sided felt laminations in 18 different colors.

Variant	Rated sound absorption coefficient according to DIN EN ISO 11654 α_w	Object-related sound absorption coefficient α_{Obj}
QuietParti	0,60 (H)	≤ 0,6
QuietParti with felt, laminated on one side	0,65 (H)	≤ 0,7
QuietParti with felt, laminated on both sides	0,65 (H)	≤ 0,7

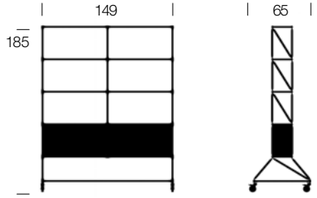
QuietParti
W/H/D: 149/185/65 cm
Dynamic space system, 4 fibre fleece panels, castors Ø 75 mm



OpenParti

As the name suggests, OpenParti is open for different types of use and is most similar in terms of structure to the classic System 180 with steel frame and shelves.

The unit works well as a compact bookshelf or magazine rack. It offers additional space for smaller work materials and a storage area that can be closed off with doors.



OpenParti

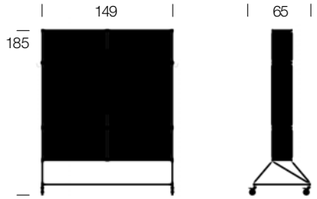
W/H/D: 149/185/65 cm

Dynamic space system, 2 double doors, 2 rear panels, 8 shelves (top level open), casters Ø 75 mm

RemoteParti

With its focus on presentation in digital as well as analogue meetings or workshops, RemoteParti relies on clever technical management. The unit offers space for a 55 inch TV, which can be covered by two FlexBoard Pro.

The five-metre cable for the power supply and multiple power connectors are discreetly integrated in the storage space behind the doors. In addition, the sides are blinded all around to reduce incidence of light from the sides and above.



RemoteParti

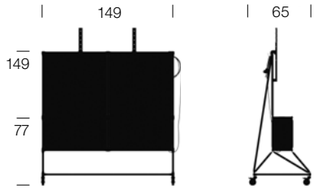
W/H/D: 149/185/65 cm

Dynamic space system, mount suitable for TVs with 55“ for all supported VESA standards, 2 double doors, 4 cable outlets, 5 m power cable, 3 Schuko plugs, 1 cable suspension, 6 back panels, castors Ø 75 mm. TV not included.

RemoteParti Pro

The RemoteParti Pro accommodates TV screens and smart-boards from 60–90 inches weighing up to 60 kilos. Thanks to a new, three-part mount, they can be height-adjusted and easily fixed in place.

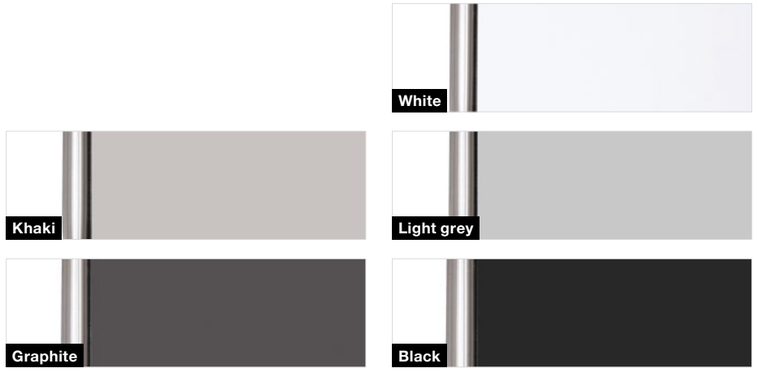
In addition to practical technology management updates such as an optimized socket configuration and cable hooks, the furniture offers additional storage space and can be pushed fluidly and easily through the office thanks to castors.



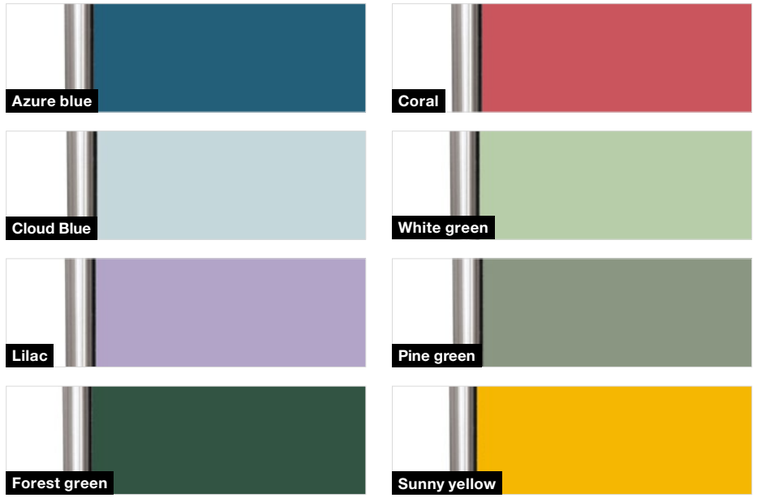
RemoteParti Pro
W/H/D: 149/149/65 cm
holder suitable for TVs with 60“ to 90” and VESA universal mount up to a maximum of VESA 1200 x 600 mm, 2 double doors, 3 cable outlets, 1 cable cover, 5 m power cable, 3 safety plugs, 1 socket station (including 1 safety plug, 1 USB charging station (C 60W), 1 USB + HDMI module), 1 cable hook, 4 back panels, casters Ø 75 mmm

Surface selection – panels

Standard Decor, melamine-covered on both sides



Colour Decor, melamine-covered on both sides



Real Wood Veneer, veneered and matt coated on both sides

Surface selection – structure

You can choose the structure of the furniture in brushed stainless steel (SteelLine) or powder-coated steel. The powder coating is available in timeless colours such as white (WhiteLine), khaki (SandLine), graphite (GraphiteLine) and black (BlackLine) or in the vibrant hues of the ColourLine finishes.

SteelLine
Brushed stainless steel.

WhiteLine
Powder-coated steel tube in white.
RAL*: 9010, smooth, matte.

SandLine
Powder-coated steel tube in khaki.
RAL*: 7044, smooth, matte.

GraphiteLine
Powder-coated steel tube in graphite.
RAL*: 7039, smooth, matte.

BlackLine
Powder-coated steel tube in black.
RAL*: 9005, smooth, matte.

*RAL numbers are approximate values.

ColourLine
Powder-coated steel tube in various colours. The available shades correspond to the decor colours of our melamine resin coatings.
