SYSTEM  180

A Table for Every Occasion

Today's working world is characterized by a high degree of individualization. The question of where we work is becoming less significant. Instead, how we work is coming to the forefront. As technology evolves at a rapid pace, our physical needs remain consistently the same. That's why we developed the BridgePro product family, designed to accommodate every working style in all conceivable body positions.

The BridgePro series offers a selection of various sizes, providing the flexibility to perfectly fit any space:

- 18 widths: from 50 to 180 cm
- 8 depths: from 50 to 100 cm
- 3 heights: 43, 75, and 107 cm

For those who also want to customize their technology, the BridgePro variants offer a variety of options for intelligent tech management in the familiar System 180 style.

Our table for every occasion is not only practical and swiftly mobile but also meets our highest design standards. Simple and elegant, the BridgePro enriches any work environment with a wide range of surfaces – from stylish decors to robust stainless steel or timeless black powder coating.

Our BridgePro family has risen to the challenge of providing a solution for every working style. Each variant of this table makes a statement without being obtrusive.

Variants

Standing Variant

The standing variant of the BridgePro table, with a height of 107 cm, is perfect for dynamic work environments where flexibility and movement are key. It is excellent for standing meetings, collaborative workshops, or as an additional workspace. This variant promotes an active posture and supports a healthy working environment by facilitating the transition between sitting and standing.

Sitting Variant

The sitting variant of the BridgePro table, with a height of 75 cm, is ideal for traditional office environments. It provides an optimal work surface for everyday tasks and meetings. Its ergonomic height is perfect for extended work periods and promotes a healthy posture. The variety of sizes and surface options allows for seamless integration into any office landscape.

Lounge Variant

The lounge variant of the BridgePro table, with a height of 43 cm, creates a relaxed and inviting atmosphere in lounge areas, waiting zones, or creative workspaces. It is ideal for informal conversations, brainstorming sessions, or as a stylish element in reception areas. The low height and elegant design make it a versatile piece of furniture that combines comfort and aesthetics.

Diverse Size Options

The BridgePro table series is distinguished not only by its various height options but also by an impressive selection of sizes. With a total of 18 different widths and 8 depths, the series offers an almost infinite combination of possibilities, enabling the perfect table to be found for almost any need and room size.

The width options range from a compact 50 cm to a generous 180 cm, while the depths can be chosen between 50 cm and 100 cm. This variety allows the tables to be used in a wide range of environments – from small nooks to large conference rooms.

Accessories

With the optional accessories available, you can optimally equip each model of the BridgePro for its intended use. The key to choosing the right accessories is determining whether technology components should be permanently installed and

connections hidden, or if devices will be frequently changed and connections need to be easily accessible. The technology box and technology insert can be equipped with different connection modules.

Technology box
The technology box consists of a technology tray, cover, and cable fixation. Connections and cables can be stored in the technology tray and disappear under the cover.

Technology insert
The technology insert is flush-mounted into the technology cutout. The connections can be equipped as needed and are easily accessible for use.

Steckdosenleisten

Power strip with 4 Schuko sockets, supply cable, and mounting, housing made of black plastic.

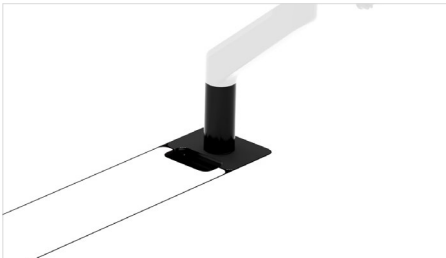

Power strip with 2 Schuko sockets, 1 USB charging station (A/C 22 W), 1 RJ45 + HDMI connection, supply cable, and mounting, housing made of black colored aluminum.

Power strip with 2 Schuko sockets, 2 RJ45 connections, 1 USB + HDMI connection, supply cable, and mounting, housing made of black colored aluminum.

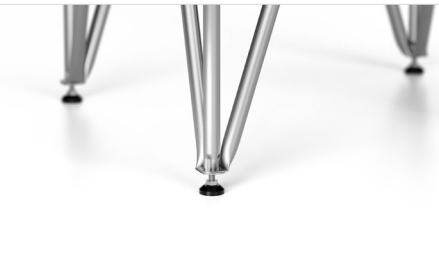

Power strip with 2 Schuko sockets, 1 USB charging station (C 60W), supply cable, and mounting, housing made of black colored aluminum.

Adapter for Humanscale Monitor Arm M8.1
The adapter, made of black powder-coated steel sheet and a plastic cover, is integrated into the technology cutout, in combination with the covers, and accommodates the M8.1 monitor arm from Humanscale. Suitable only for monitors with a maximum weight of 12 kg (standard monitor) or 9 kg (curved monitor).

Rollers
The tables in the BridgePro series are standardly equipped with casters with brakes.

Feet
Alternatively, tables with a fixed placement can be equipped with simple threaded leveling feet.

Surface selection

The BridgePro series offers you a wide range of design options: You can choose the tubing structure in the quality SteelLine or BlackLine.

You can choose the table surfaces in the qualities uni-decor, real wood veneer or furniture linoleum.

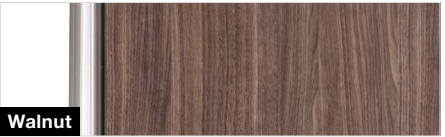

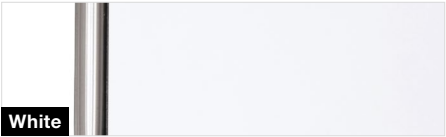

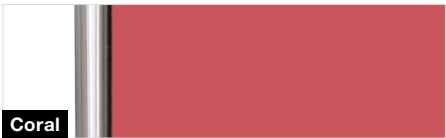

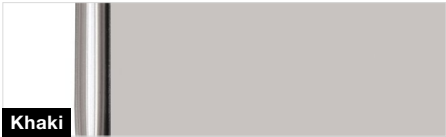

SteelLine
Brushed stainless steel

BlackLine
Steel, powder coated in black

Unidecors
Coated on both sides with a protective coating of melamine resin.

Real wood veneers (upon request)
Both sides covered with fine real wood veneer and matt lacquer. Please note that real wood veneer is a natural material. The image and colour of the veneers used may diverge. Larger surfaces are made from individual panels, which may differ in colour and image. Real wood changes its colour when exposed to light.

Table surfaces using Forbo furniture linoleum
Surface coated with high-quality furniture linoleum.
